

MOBILE CODE EDITS

icebaejewelry.com

Fix mobile carousel aspect and display ratio

I have mobile banners

01 - style.css

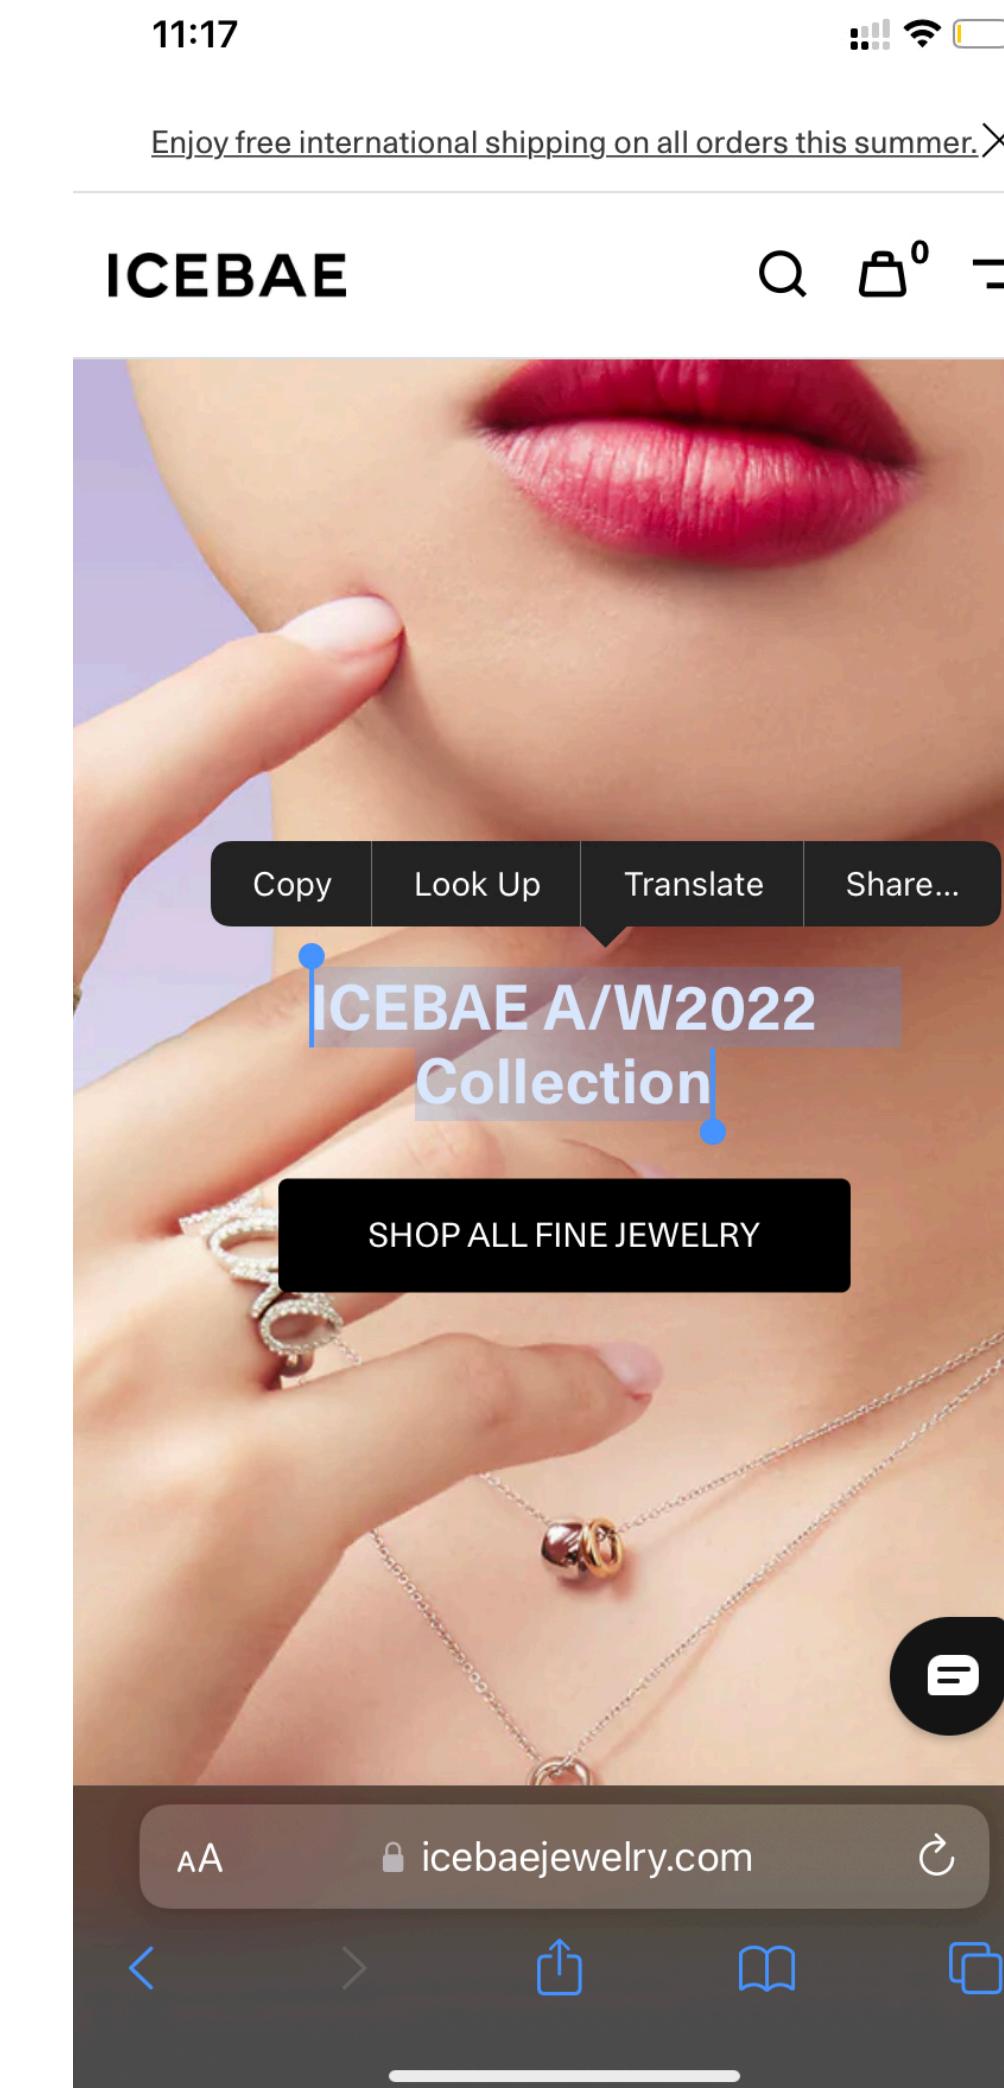

The screenshot shows a Mac OS X desktop with a Chrome browser window. The browser is displaying the Shopify admin interface at <https://onur-jewelry.myshopify.com/admin/themes/130480341183?key=assets/style.css.liquid>. The title bar of the browser says "ICEBAE ~ Edit ~ ICEBAE Official" and "ICEBAE® Official Site | Design". The main content area is titled "Edit code for ICEBAE Official" and shows the "style.css.liquid" file. The code editor has a sidebar on the left listing files such as custom.js, lazysizes.min.js, left-arrow.png, libs.min.js, lick.png, minus.png, password.jpg, paypal-image.png, plus.png, qty-arrow.png, right-icon.png, rose-gold.png, select-arrow-new.png, select-arrow.png, size-select-arrow.svg, style.css.liquid, tab-arrow.png, theme.css, theme.js, white-gold.png, wifi-cemera.png, yellow-gold.png, and zoom-Plus-new.png. The "style.css.liquid" file contains CSS for a mobile carousel, specifically targeting screens with a maximum width of 767px. The code includes styles for the image container, the image itself, and various heading elements.

```
background-color: transparent;
outline: 0px solid transparent;
}
@media screen and (max-width:767px){
.Slideshow__ImageContainer{
padding:200px 0;
}
section.Section.Section--spacingNormal header.SectionHeader.SectionHeader--center h3.SectionHeader__SubHeading.Heading.u-h6{
text-align:left;
padding:0;
}
.js .Slideshow__Image{
left:50%;
width:auto;
max-width:inherit;
-moz-transform: translateX(-50%) !important;
-webkit-transform: translateX(-50%) !important;
-o-transform: translateX(-50%) !important;
-ms-transform: translateX(-50%) !important;
transform: translateX(-50%) !important;
}
.Carousel__Cell .features--heading-uppercase .Heading {
font-size: 16px;
letter-spacing: normal;
}
section.Section.Section--spacingNormal h2.SectionHeader__Heading.Heading.u-h1 {
display: none;
}
section.Section.Section--spacingNormal h3.SectionHeader__SubHeading.Heading.u-h6 {
```

Make carousel title fonts smaller on mobile

02 - style.css

Trending Jewelry to be the same height as desktop and tablet

03 - style.css

Shave the bottom of the cart preview (20 pixels height).

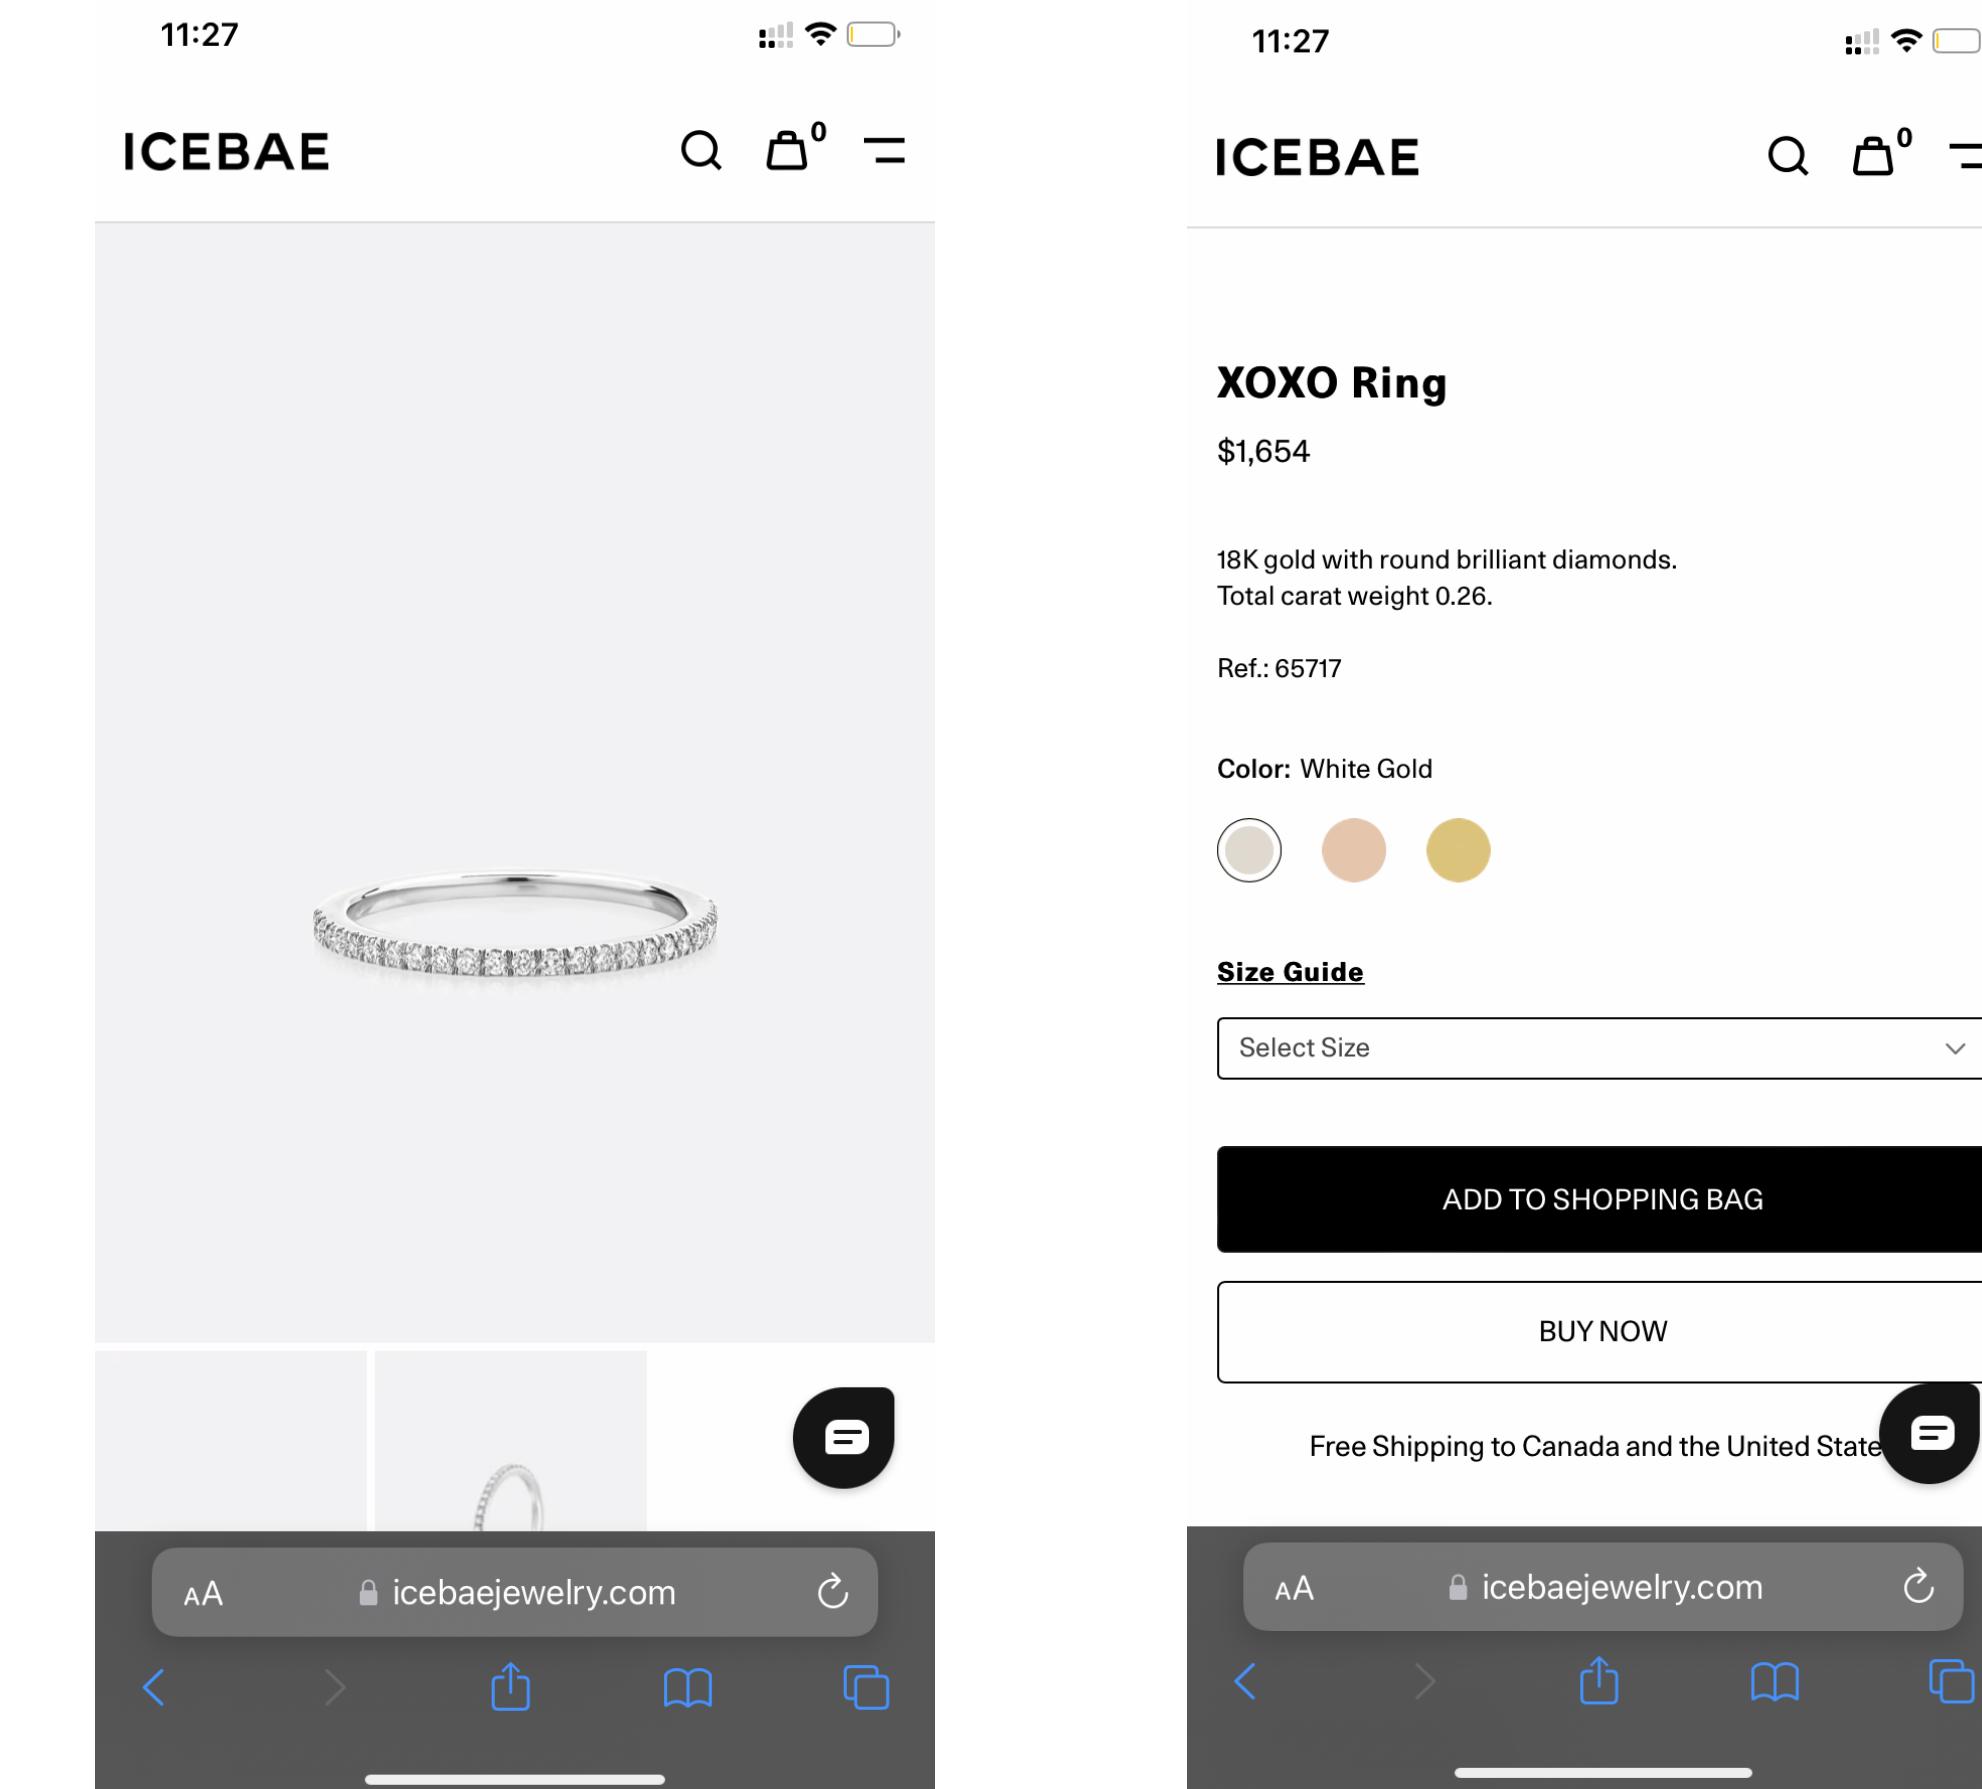

(From last time)

05

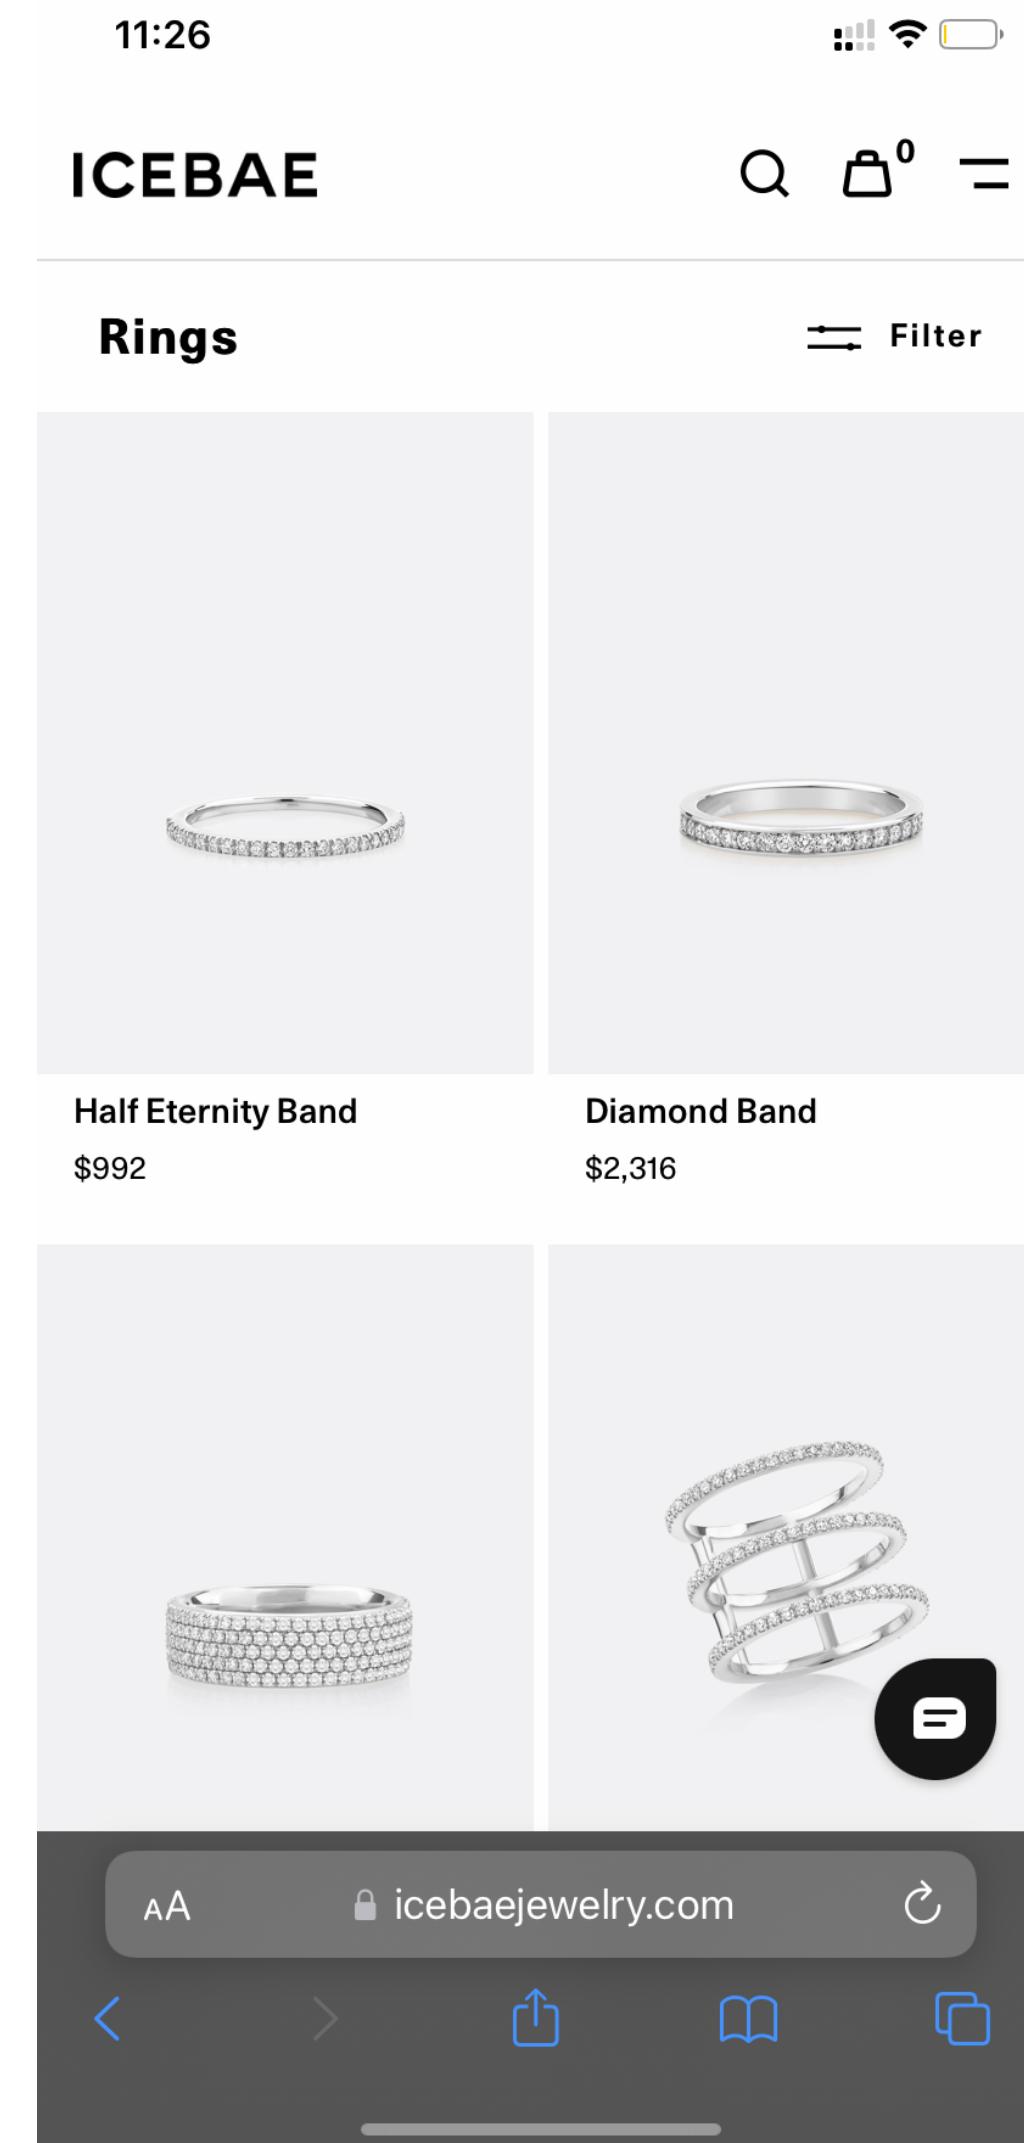

Remove manual scrolling from the first image.
Images still don't load until you touch them.

06

Align list view title and filter to left and right on mobile.

07

Hide the chat icon from all pages except:

List view, Product Pages, Cart Page

08

Sample code

```
<script>
    function initFreshChat() {
        window.fcWidget.init({
            token: "WIDGET_TOKEN",
            host: "https://wchat.freshchat.com",
            "config": {
                "headerProperty": {
                    "hideChatButton": true
                }
            }
        });
        function initialize(i,t){var e;i.getElementById(t)?initFreshChat():
((e=i.createElement("script")).id=t,e.async=!0,e.src="https://
wchat.freshchat.com/js/
widget.js",e.onload=initFreshChat,i.head.appendChild(e))}
        function initiateCall(){initialize(document,"Freshchat-js-sdk")}
        window.addEventListener("load",initiateCall,!1);
        window.attachEvent("load",initiateCall,!1);
    }
</script>
```

```
<script>
window.fcWidget.init({
"config": {
"headerProperty": {
"hideChatButton": true
}
},
"host": "https://wchat.freshchat.com",
"token": "2acecd2c-4bf9-4201-81dc-577241f05a71"
});
</script>
```

Move header icons altogether to the left so the cart number is aligned to the right margin.

09 - Home Page Desktop

10 - Desktop product zoom

Replace those icons with minimal ones. Same size but no circle with shadow around them

Can you also remove the drop shadow from this one?
